Designex 2008

This is a last minute reminder that Designex starts this Thursday and here are a few compelling reasons why you should plan to visit us as part of your time at the show.

We are at stand 340 in Hall 1. Just look for the floating sign.

I'm listing a few reasons below. You will see:

1) The very latest trends from Heimtex 2008. We visited on your behalf and this year there were a number of things to really get excited about.

2) Find out why we are so excited about my new Signature Collection. See it, touch it, feel it.....order it!
The best blind fabric collection you have ever seen, all in one box. Don't miss this opportunity.

3) See the prototype of Simply Natural incorporating our trend setting Chinois collection and find out why paper is the newest fabric to make an impact on window coverings., the next range of natural woven fabrics we will launch and the best ever assembled in Australia. See the look of the future.

4) **See Horizon. This new system will revolutionise the way we look at room dividers and space divisions and even a different approach to window coverings. A design award winner at Heimtex this year.**

5) See the newest look in pleated shading. This is special.

6) **See Micro Panels and Ballet. Two brand new products that will change the face of window coverings in Australia.**

7) If all that's not enough, come and say hello to me. If you already know me, I'd love to see you, if you've never met me, come and say hello.
I look forward to meeting you,
